

Proven^{DB} | Compliance Vault

ProvenDB Compliance Vault is a cost-effective software solution that provides a tamper-resistant digital store for your critical compliance information. The ownership and creation date of information stored in ProvenDB Compliance Vault can be definitively proven by stringent industry standard cryptography. With ProvenDB Compliance Vault, you can be certain that your compliance data will satisfy the most rigorous compliance audit.

ProvenDB Compliance Vault is for all your critical compliance documents:

- Anti-Money Laundering and Counter-Terrorism Financing records.
- Know Your Customer (KYC) documents.
- Board minutes and resolutions.
- Receipts, invoices, and other documents are supporting tax claims.
- Credit Reporting Privacy disclosures and activities.
- Contracts, applications, and all materials that form the basis of a financial credit assessment.
- Timesheets and employment records.
- Certifications.
- Personal Information Consents.
- Significant email trails.

How ProvenDB works

1. Documents are uploaded to the vault, directly from apps, uploaded from file systems, or forwarded via emails.

2. Digital signatures for the documents are stored on an immutable, unhackable public Blockchain.

3. ProvenDB Compliance Vault continually monitors the integrity of the data to detect any attempts at tampering or falsification.

4. You can be certain that your compliance data will satisfy the most rigorous compliance audit.
