Proven DB | For DocuSign

ProvenDB For DocuSign provides a tamper-resistant digital store for your DocuSign documents. We guarantee the origin, ownership, versioning, and security of your documents. Proof of your document's content, ownership, and origin date are proved by immutable and tamper-proof blockchain signatures.

What documents go into ProvenDB For DocuSign?

- Legal Agreements, Contracts, Applications and Consents

- Financial, Stock Purchase and Note Subscription Agreements

- Board and Shareholder Agreements and Consents

- Employment Contracts, Performance Reviews and Dismissals

- Construction, Contractor and Engineering Contracts, Agreements and Approvals

- Real Estate Contracts, Agreements, Amendments, Disclosures, Policies and Deeds

- Insurance Policies, Applications, Documentation and Claims

- Any important paperwork that requires a signature - Insurance, Property, Construction, Legal, Finance

How ProvenDB For DocuSign works

1. Add your unique ProvenDB email address as a "Receives a Copy" recipient in your DocuSign email routing list.

2. When all participants have signed, ProvenDB will store a digital signature ("hash") of your document on an immutable, unhackable, public Blockchain.

3. You'll receive a digital proof in your email that includes the cryptographic proof for the document. You can also view the proof on the ProvenDB for DocuSign dashboard.

4. The digital proof can be used to prove the signing date and contents of your document. This proof is independent of any third party and represents incontrovertible proof of date and document contents.

Key features and benefits

Irrefutable Proof of Ownership and Origin Date
Proof of your document's provenance are stored on an immutable public Blockchain. These proofs are independent of any third party.

Integrated Into Your DocuSign Workflow
By simply adding your unique ProvenDB email address into the DocuSign workflow, your Blockchain proofs will be automatically generated when all parties have signed.

Independent Proofs
Create Blockchain-based proofs attesting to the origin date and contents of your DocuSign envelopes. These proofs are independent of the DocuSign or ProvenDB companies - they can be used to prove the integrity of your envelops without requiring attestation from a third party.

Economical
There is no need to trade in Cryptocurrencies. Add Blockchain proofs to your DocuSign documents for as little as $25/month for unlimited documents.
